Part I: READING**Instructions:** Read the passages and choose the best answer (1), (2), (3) or (4).**Passage 1****Computer Games**

They isolate children socially and distract them from learning, right? Think again. Researchers have found that kids who **clock up** regular console time can improve their hand-eye coordination, their grip on science, even their IQ.

5 A 2002 study of 700 children found that stimulation and adventure games such as *Sim City* and *RollerCoaster Tycoon* developed children's strategic thinking and planning skills. A research by Peter Excell, head of computing and communications technology at Glyndwr University in Wales, suggests computer games are a great way to explain the basics of physics. (A weapon thrown in a game, for example, has to follow a certain **trajectory**, illustrating the laws of

10 gravity.) Bishop John Robinson Primary School in Thamesmead, London, actually started a pilot project in September last year using 16 Nintendo DS consoles running the *Maths Training Game* with a Year Five class – who were so engaged that other classes are now sharing the consoles and some students have asked

15 their parents to buy the games to use at home.

- The writer wants to say that
 - computer games have bad names.
 - computer games are also played at schools.
 - computer games are not always bad.
 - computer games need players to concentrate.
- It is claimed that playing computer games help children get better in
 - calculating.
 - scheduling.
 - computing.
 - schooling.
- According to the passage, computer games cannot be used to teach basic
 - Science.
 - Physics.
 - Maths.
 - English.
- Computer games, however, are blamed for
 - blocking children's ideas.
 - encouraging children to learn.
 - separating children from social life.
 - entertaining children at home.
- The study of Bishop John Robinson showed that children are
 - more interested in maths.
 - interested in the same game.
 - not interested in learning new things.
 - less interested in maths than in physics.
- "clock up" in line 2 means.....
 - explain
 - spend
 - play
 - learn
- "trajectory" line 9 means
 - path
 - range
 - game
 - screen

Passage 2

For any business, the cost of transportation is normally the largest single item in the overall cost of physical distribution. It doesn't necessarily follow, though, that a manufacturer should simply pick the cheapest available form of transportation. Many companies today use the total physical distribution concept, an approach that involves maximizing the efficiency of physical distribution activities while minimizing their cost. Often, this means that the company will make cost tradeoffs between the various physical distribution activities. For instance, air freight may be much more expensive than rail transport, but a national manufacturer might use air freight to ship everything from a single warehouse and thus avoid the greater expense of maintaining several warehouses.

When firm chooses a type of transportation, it has to bear in mind its other marketing concerns—storage, financing, sales, inventory size, and the like. Transportation, in fact, can be an especially important sales tool. If the firm can supply its customers' needs more quickly and reliably than its competitors do, it will have a vital advantage: so it may be more profitable in the long run to pay higher transportation costs, rather than risk the loss of future sales. In addition, speedy delivery is crucial in some industries. A mail-order distributor sending fruit from Oregon to Pennsylvania needs the promptness of air freight. On the other hand, a manufacturer shipping lingerie from New York to Massachusetts may be perfectly satisfied with slower (and cheaper) truck or rail transport.

8. The author states in the passage that the total physical distribution concept
- | | |
|--|--|
| (1) relies on using warehouses for storing goods | (2) suggests trading goods for transportation services |
| (3) advocates the use of air freight because of its efficiency | (4) is based on the capability and cost-effectiveness of a transportation system |
9. According to the passage, all of the following would influence the type of transportation that a company might choose EXCEPT
- | | |
|-------------------------------------|---------------------------------|
| (1) the type of goods to be shipped | (2) the size of its warehouses |
| (3) the time it takes for delivery | (4) the expense of the shipping |
10. The phrase "cost tradeoffs" in line 7 means that companies
- | | |
|---|--|
| (1) rarely use rail transport | (2) prefer warehouses to air transportation |
| (3) sometimes engage in bartering goods | (4) may choose an expensive form of transportation if costs can be cut in another area |
11. The word "its" in line 15 refers to
- | | |
|--------------|----------------|
| (1) firm | (2) competitor |
| (3) customer | (4) sales tool |
12. It can be inferred from the passage that transportation is
- | | |
|---|--|
| (1) too expensive for most mail-order industries to use | (2) independent of other business concerns |
| (3) important to continued successful sales | (4) not used effectively by businesses |

Passage 3

WORKPLACE ETIQUETTE

WANT TO MAKE A MEMORABLE impact in your first job? Keep in mind it's not only your work performance that employers notice - it's also your work etiquette.

- 5 Patrick Sullivan, who runs the Canadian job-search website Workopolis, offers three tips for teens as they pursue holiday or part-time jobs.

Dress for success: From the start, dress appropriately - not like you're meeting school pals. It shows you're serious and mindful of the environment. "When applying for a job, dress like you're already an employee there. And once you get a job, ask how to dress. Don't look at it casually because it's short-term."

- 10 **Give co-workers their due respect:**

"Not just because they're older or have been there longer, but because you'll learn from them. Ask questions about the job, how people operate, and what's appropriate in the workplace. It will put you in good stead."

- 15 **Remember the basics:** "Smile, look people in the eye, and shake hands firmly. You've been hired for a reason. Present yourself confidently, and you'll be treated with confidence."

Common courtesies can pay off in great references from your employers. "That first job is your foundation," says Sullivan, "and you need to leave a positive impression."

STUART FOXMAN

13. The main idea of this passage is
- | | |
|---|---|
| (1) good manner is as important as good work in an office. | (2) employers are interested only in your performance. |
| (3) people do not expect you to be polite when you apply for the first job. | (4) smiles are more impressive and they give you more chances to being hired. |
14. This passage is aimed to teach young people who
- | | |
|-------------------------|-----------------------------|
| (1) already have a job. | (2) find a temporary job. |
| (3) do not behave well. | (4) are serious about jobs. |
15. These young people should dress up appropriately to show that
- | | |
|---|---|
| (1) they will save the green environment. | (2) they are as mature as others in the office. |
| (3) they do not care for the money they will get. | (4) they want to do the job and respect people around them. |
16. These young people should give their co-workers their respect so that
- | | |
|--|---|
| (1) they will be confirmed they are still young. | (2) they will get promoted by the boss. |
| (3) they will learn how to work from the co-workers. | (4) they will be able to make mistakes. |
17. According to this passage, the most important thing when you do your first job is
- | | |
|------------------------|-----------------------------------|
| (1) impact on the job. | (2) smiles and confidence. |
| (3) money and time. | (4) positive feeling from others. |

Passage 4

Dear Sir/ Madam,

I'm writing here to complain about your online delivery service which has failed to deliver three books and two DVDs I ordered two months ago (on 14th September).

- 5 Last week I sent an email to your online customer service department and I was informed that the order would arrive in three weeks. However, I am afraid this is totally unacceptable.
